MANAGEMENT DISCUSSION AND ANALYSIS REPORT

HIGHLIGHTS AND KEY EVENTS

During the year company has successfully commissioned its amines product forward integration through Ethoxylation plant at its Baroda location. This saved cost of sub contracting of company, increase in production capacity and introduction of new range of ethoxylated products in the global market.

The company's US subsidiary M/s Indo Amines Americas LLC has made a significant headway in introducing company's product in the US market in this year. In near future US will become a prime market segment.

CTR application lab set up at Dombivli location in July 2014 has made significant success in developing in house technology new products & improving quality & processes of existing products.

GLOBAL SCENARIO

Global economy continued to expand at only a moderate estimated pace of 2.6 per cent in 2014-15. Most economies have seen a shift in gross domestic product (GDP) growth to a noticeably lower path compared to pre-crisis levels, raising the spectre of longer-term mediocre economic growth. Growth rates in developing countries and economies in transition have become more divergent during 2014-15. United States was stronger than expected, while economic performance in all other major economies—most notably Japan—fell short of expectations.

Oil prices in U.S. dollars have declined by about 55 percent since September 2014. The decline is partly due to demand weakness in some major economies, in particular, emerging market economies—also reflected in declines in industrial metal prices. Oil prices are projected to continue softening in 2015–2016, as the growth of demand for oil is expected to remain weaker than the increase in supply of oil. Non-oil commodity prices have also been on a decreasing trend, although they still remain high relative to their long-term trend of the past decades.

DOMESTIC SCENARIO

During January 2015 government changed base year from 2005-06 to 2011-12 to reflect structural changes in economy. Changes were made in Gross Domestic Product (GDP) reporting, GDP at factor cost will henceforth be presented as Gross Value Added (GVA) at basic prices for industry wise estimates.

The Indian economy grew at 7.3 per cent in 2014-15 as a result of improvement in the performance of both services as well as manufacturing sectors. The manufacturing sector recorded a growth rate of 8.4 per cent during the last quarter of last fiscal, up from 4.4 per cent a year ago. The services sector too witnessed marked improvement during the quarter. Further, this growth is expected to further improve to 7.4% in FY 2015-16 according to the Central Statistics Office

Mining and quarrying sectors remained laggards in the January-March quarter. The data showed that farm output during the quarter declined by 1.4 per cent as compared to a growth of 4.4 per cent in the corresponding quarter of the previous fiscal.

Government through policy reforms achieved objectives like control over inflation, unemployment, sector & geographical imbalances, etc. Government has also focusing on medium to long term objectives for transformation and development. These long-term objectives will be achieved through building civil and social infrastructure projects across the Country. Measures for improvement in the economy are being carried out like land acquisition for development, ensuring availability of energy along with the rationalization of fuel prices and ending subsidy in the case of fuel.

CHEMICAL INDUSTRY – STRUCTURE & DEVELOPMENT

The Chemical Industry is critical for the economic development of any country, providing products and enabling technical solutions for virtually all sectors of the economy.

The global chemical industry is witnessing a gradual eastward shift. The industry is increasingly moving eastwards in line with the shift of its key consumer industries (e.g. automotive, electronics, etc.) to leverage greater manufacturing competitiveness of emerging Asian economies (especially India & China) and also to serve the increasing local demand. Substantial new capacities in the world are expected to come up in Asia and Europe. Operating profits in the sector have increased and many companies were able to push stronger cash flows

down to the bottom line. However, the overall growth of the chemical sector was hampered by economic slowdown across US and Europe.

With rising concerns about climate change and depleting natural resources, focus on sustainability is another key trend impacting the global chemical industry. Chemical companies are increasingly working towards reducing energy intensity of their operations, minimizing effluent discharge, increasing the share of recyclable products in their portfolio and diversifying their raw material base to include bio-feedstock.

INDUSTRY STRUCTURE AND DEVELOPMENT

Your Company is a leading manufacturer of Speciality Chemicals with diversified end-uses into Agrochemicals, Pharmaceuticals, High Performance Polymers, Paints, Pigments, Printing Inks, Rubber Chemicals, Additives, Surfactants, Dyes, Flavours & Fragrances, Home & Personal Care applications, etc. Your Company makes continuous efforts to explore and innovate new products & processes in all segments. This diversified end-user base helps the Company to de risk itself from downturn in any individual business segment and also to capitalize on the growth opportunities in each of the end-user segments.

Your Company has making substantial Investments every year for upgrading the ETP setup of the Company including setting up additional process to minimise the quantity and impurity profile of the effluents. With this efforts, the Company had upgraded two of its Manufacturing Units into Zero Discharge Unit and also has put in place various processes to control/limit generation of effluents and improve on the treatment of the same. As part of the Risk Management policy, the relevant parameters for all manufacturing sites are analyzed to minimize risk associated with protection of environment, safety of operations and health of people at work and monitored regularly with reference to statutory regulations and guidelines defined by the Company. The Company fulfills its legal requirements concerning emission, waste water and waste disposal. Improving work place safety continued to be top priority at all manufacturing sites.

PERFORMANCE CHEMICALS

Performance Chemicals are defined as a "group of relatively high value, low volume chemicals known for their end user applications or performance enhancing properties." In contrast to base or commodity chemicals, Performance Chemicals are recognized for what they do and not 'what they are'. Performance Chemicals provide the required solution to meet the customer application needs. It is a highly knowledge driven segment. The critical success factors for the Performance Chemicals segment include understanding of customer needs and product/ application development

AGRI-INTERMIDIATES AND FERTILIZERS

The Indian's crop protection chemicals market is growing with a rate of around 7.5% driven by steady export growth of crop protection chemicals from India at the cost of Chinese products. The country is the fourth leading producer of Agrochemicals after USA, Japan and China.

Increasing population, high emphasis on achieving food grain self sufficiency, limited farmland availability coupled with pressure to increase yield per hectare and growth in horticulture and floriculture are expected to increase the usage of agrochemicals across the world. India's exports of agrochemicals are steadily rising. Many foreign companies are tying up with local manufacturers to expand into this sector for domestic & global requirements.

The Indian Government has framed a new fertilizer policy under which the Government will not fix the producer's price for the new units, to encourage growth in the fertilizer sector. However, the Government has announced a nutrient based subsidy programme and more effective scheme for distribution of the subsidy, directly to the end users (farmers) is also under consideration.

CAPEX AND GROWTH PLANS

The Company has ambitious plans for its new manufacturing sites namely at Mahad and at Dhule Maharashtra 9 acre Industrial plot is ready for new project, new product and new industry in the time to come.

Your Company is ready to take the challenges of increased demand by continuously investing in up-gradation and expansion of its manufacturing capacities at various locations.

We are committed to continuous growth plans for the Company. We expect that next 2-3 years are very crucial for the quantum leap of the Company.

INTERNAL CONTROL SYSTEMS

Our Internal Audit Dept is continuously working to improve on Internal Checks and Internal Control Systems in the Organisation. We have in place internal control systems in all spheres of activities commensurate with the size of the Company. The internal control is supplemented by effective internal audit being carried out by an external firm of chartered accountants. The Audit Committee of Directors regularly reviews the findings of the Internal Auditors and effective steps to implement the suggestions/observations of the Auditors are taken and monitored regularly. Your Company also has laid down procedures and authority levels with suitable checks and balances encompassing the entire operations of the Company.

CORPORATE SOCIAL RESPONSIBILITIES

We recognise our company as part of society and as contribution towards community development and to fulfil the company's obligations towards the society, the Company has through it's CSR committee taken several initiatives during the concluded financial year. Various programs towards corporate social responsibility are implemented during the year. Few of these initiatives are briefed here under:

- i) Blood Donation Camps.
- ii) Distribution of books, Note books to needy students.
- iii) Installation of Water cooler in schools.
- iv) Tree plantation and its maintenance.
- v) Scholarship to SSC and HSC passed students of employees.
- vi) Blood & Health check up camps.

OPPORTUNITIES, CONCERNS, OUTLOOK AND CAUTIONERY STATEMENT

Your company is a manufacturer, developer and supplier of Fine chemicals, Oleo chemicals, Specialty chemicals, Performance Chemicals, Perfumery Chemicals and Active Pharmaceutical Ingredients. Major growth opportunities will come from USA, South Africa, and European countries like Germany, UK, Spain. Indo Amines knows the importance of its products' use in the production of intermediaries used in major industries like pharmaceuticals, Agro-chemicals, Petro-chemicals, Fertilizer, Road construction chemicals and Pesticides industries. Some of the unusual industries include solvent and rubber processing industries. To contribute to all of this, our in-house research team and technical team will stand still as a backbone of company's growth and will provide ample number of opportunities to enlarge company's market share.

Most of our raw materials prices are influenced by changing crude prices, exchange rates and volatile market conditions. Our major raw materials are subject to change in government policies, like government's Alcohol price policies and its dynamic use in a sugar Industry. Other oil and petroleum based raw materials are subject to international price deviations in oil market.

Other petroleum based raw materials are subject to international gas/crude oil price fluctuation. Being a global player, we are also exposed to competition not only from domestic players but also large international players. Cheap imports especially from countries like China could pose problems, which would have to be faced by consistency in quality of the products and improving production efficiencies.

OUTLOOK

For the year 2014-15, our focus will continue on sustainable growth by taking measures for increasing our market share of existing products and creating new business in untapped growth market segments in Export market. Though there is sluggish demand in certain sectors and also increased competition from global and domestic players, we expect the trend shown in 2013-14 to continue in the year 2014-15. However, we expect that in some segments the market share of existing product line will increase due to expansion of capacities.

An audit involves performing procedures to obtain audit evidence about the amounts and the disclosures in the financial statements. The procedures selected depend on the auditor's judgment, including the assessment of the risks of material misstatement of the financial statements, whether due to fraud or error. In making those risk assessments, the auditor considers internal financial control relevant to the Company's preparation of the financial statements that give a true and fair view in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on whether the Company has in place an adequate internal financial controls system over financial reporting and the operating effectiveness of such controls. An audit also includes evaluating the appropriateness of the accounting policies used and the

reasonableness of the accounting estimates made by the Company's Directors, as well as evaluating the overall presentation of the financial statements.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion on the standalone financial statements.
